

## The Lakeville Olympics

By Jonathan

When the world was starting the Olympics in Korea this year, so was Lakeville School! Read this to find out how our school played in the Olympics during gym classes. The sports we did at Lakeville were different than the real Olympics because the sports had different rules and different materials. For example, the Bobsled was different at Lakeville because our bobsleds were made of soft slabs (gym mats) because we had to do it in the gym. We had to change a lot of the sports because we did the sports in the gym. The whole school was in the in the Olympics and the Olympics went for a long time. I hope you get to do something like this too!

## Our Character Projects

By Laura

Our class made character projects about characters from great books' traits and feelings. Each person in our class picked a character from a favorite book and then our class painted our characters and wrote each character's feelings and traits. We did this project in our classroom in March. We worked on this project to learn and understand more about our characters. We made our project by using a big white paper, then we got a pencil to draw the character's face, and after we were done drawing the character, we colored the characters with crayons. Lastly, we cut out paper hearts and wrote the character's feeling inside the hearts. Come and see our character projects yourself!

## Fun Friday

By Charlotte

Do you know what Fun Friday is? If you don't, know I'll teach you. Who has Fun Friday? Mrs. Gordon's class does. What is Fun Friday? It is a play time we have when it's Friday afternoon. Where do we have it? Well, it's in my classroom! You might ask, when do you have it? The answer is, we have it every single Friday. We have Fun Friday because we all work so hard from Monday to Friday that we need some playtime with each other. You might wonder how we play on Fun Friday. We do it by playing with blocks, felt people, drawing, playing Bingo, playing Harry Potter and other games too. Fun Friday is very, very fun. Fun Friday is the best thing in the whole world. If you're lucky, you can try this in your class too.
